

FINAL REPORT

Project title: Sports Hall Booking System By Service Portal

Introduction

a) Project Overview

The Sports Hall Booking System using ServiceNow Service Portal is a web-based application that automates the sports hall booking process. Administrators can efficiently manage approvals and maintain booking records through the ServiceNow platform.

b) Purpose

The purpose of this project is to provide a simple, secure, and efficient online booking system for sports halls.

IDEATION PHASE

1. Brainstorming – Idea Generation & Prioritization

The idea for the Sports Hall Booking System using ServiceNow Service Portal was developed to overcome the problems of manual sports hall booking. The system provides online booking, real-time hall availability, admin approval, booking history, and email notifications.

2. Brainstorming Template

Problem: Manual booking causes delays and scheduling conflicts.

Solution: Develop an online booking system using the ServiceNow Service Portal.

Target Users: Students, Faculty, Sports Department Staff, and Administrator.

Benefits: Easy booking, faster approvals, reduced paperwork, transparent status, and better resource management.

3. Define Problem Statement

The existing manual booking process is slow, inefficient, and prone to double bookings. A centralized ServiceNow-based booking system is needed to automate booking requests and approvals.

4. Problem Statement Template

- **Problem:** Manual sports hall booking.
- **Users:** Students, Faculty, Sports Department.
- **Importance:** Reduces delays and booking conflicts.
- **Solution:** Online booking with automated approvals and notifications.

5. Empathy Map Canvas

User: Students and Faculty.

Says: "I want to book a hall quickly."

Thinks: "Will my booking be approved?"

Does: Checks availability and submits a booking request.

Feels: Frustrated by manual booking but satisfied with quick approvals.

6. Empathy Map Summary

User	Need	Pain Points	Gain
Students & Faculty	Quick online booking	Manual process, delays, double booking	Fast, transparent, and easy booking

Phase 1 Outcome

- Finalized the project idea.
- Identified existing problems.
- Defined the problem statement.
- Analyzed user needs using the Empathy Map.

REQUIREMENTS ANALYSIS

1. Customer Journey Map

- Login to portal
- Check hall availability
- Submit booking request
- Admin approves/rejects

2. Data Flow Diagram (DFD)

DFD (Level

- User sends booking request
- System stores data
- Admin checks and approves/rejects
- System updates status

3. User Stories

User Story 1

As a Student, I want to log into the Service Portal so that I can book a sports hall.

User Story 2

As a User, I want to view available sports halls so that I can select a suitable date and time.

User Story 3

As a User, I want to submit a booking request so that I can reserve a sports hall online.

User Story 4

As an Administrator, I want to approve or reject booking requests so that I can manage hall availability efficiently.

User Story 5

As a User, I want to receive email notifications so that I know the booking status.

User Story 6

As a User, I want to view my booking history so that I can track previous and upcoming bookings.

4. Solution Requirements

Functional

- Login system
- View halls
- Book halls

Non-Functional

- Secure
- Easy UI
- Reliable

5. Solution Requirements Summary

Input: Login, hall, date, time

Process: Check, validate, approve

Output: Confirmation, status, history

6. Technology Stack

Component	Technology Used
Platform	ServiceNow
Frontend	Service Portal
Backend	ServiceNow Server-side Scripts
Database	ServiceNow Tables
Workflow	Flow Designer
Forms	Service Catalog & Record Producer
Notifications	Email Notifications
Development Language	JavaScript, HTML, CSS

7. Conclusion

This system makes sports hall booking easy, fast, and automated with proper approval and notifications.
